

The Woodcut Tarot Deck

78 cards and 2 extras at real tarot size: 70 × 120 mm (2.76 × 4.72 in), four per US Letter sheet.

IN THIS FILE

Page 1 — these instructions. **Page 2** — the list of cards on each sheet.

Pages 3–42 — 20 sheets of four cards. Each sheet of cards (odd page) is followed by its backs (even page), so a two-sided print puts every back behind its card.

PAPER

Matte or satin card stock, **200–300 gsm** (about 80–110 lb cover). Check the heaviest paper your printer takes; most home printers manage 200–250 gsm through the rear tray.

Plain paper is fine for a test sheet, or for gluing onto card stock.

PRINTER SETTINGS

Scale: Actual size / 100%. Switch off “Fit to page” or “Shrink to fit”, or the cards come out smaller than tarot size.

Two-sided: flip on long edge. Pages: 3–42. Color, best quality.

CHECK THE ALIGNMENT FIRST

Print pages 3–4 on plain paper and hold the sheet up to a light. The backs should sit behind the cards; the crop marks on both sides should meet.

NO TWO-SIDED PRINTER

Print the odd pages 3–41 (the cards). Put the printed stack back in the tray the way your printer's manual shows for manual duplex, then print the even pages 4–42 (the backs).

Or print the separate one-page backs file and glue the fronts to the backs.

CUTTING

Cut along the lines that join matching crop marks at the edges of the sheet. Each card carries 2 mm of extra color past the cut line, so a cut that drifts a little will not show white.

A paper trimmer, or a craft knife with a metal ruler, gives the cleanest edge. A 3–4 mm corner punch rounds the corners; standard 70 × 120 mm tarot sleeves fit the cards.

SCALE CHECK

Printed at 100%, these bars measure exactly 50 mm and 2 inches. If they do not, the printer is scaling the page.
